Specialtys Café and bakery

San Jose, CA

BOH Sandwich line, Salad line, Catering prep, Line prep, Pastry prep, July 2016 to Sept. 2017
Kitchen manager assistant.

- Worked overtime in the time of need when we were low on employees and did 16 hour shifts 5 days a week for # months
- While giving people their first breaks in the morning for the sandwich, salad, and catering line I would prep some food, pastries, bread, and set up the stations for them. I would even at times do dishes to ensure we had extra utensils in case we needed them.
- I assisted the KM with making sure to keep the walk-in fridge and freezers items all tagged and dated and properly labeled and as well as to make sure that food that needed to be tossed out, tossed. I would pull out pastry bread, bread, meats, and prep more food for the following day to make sure that the team could set up as quickly and easily as possible by portioning at night and setting it aside.

Digital Storm

Gilroy, CA

Computer Engineer

- Building custom systems specified by the order.

I would help provide some insight and speak out on behalf of other employees when they needed some assistance or were too shy to speak out about something and as well help train new employees. I have had experience in computer assembly and diagnostics.
